Christoffel symbols and connection forms on infinite-dimensional fibre bundles. Bull. Soc. Math. Grèce 15 (1974), 115–122.

On the holonomy theorem. Prakt. Akad. Athènòn 51 (1976), 463–467.

Connections on 1-jet principal fibre bundles. Rend. Sem. Mat. Univ. Padova 56 (1976), 25–33.

On related connections and the 1-jet principal fibre bundle. Preprint Ser. 1977/1978, No 7, Matematisk Institut, Aarhus Univ. pp. 17.

Affine transformations of banachable bundles of frames. Mathematica Balkanica 6:46 (1978), 291–295.

(f, ϕ, h)-related connections and Liapunoff's theorem. Rend. Circ. Mat. Palermo, Ser. II, 27 (1978), 337–341.

On the canonical connection of the 1-jet bundle of a principal bundle. Bull. Soc. R. S. Liège 47 (1978), 5–11.

On the infinite-dimensional holonomy theorem. Bull. Soc. R. S. Liège 47 (1978), 223–228.

On affine transformations of banachable bundles. Colloq. Math. 44 (1981), 117–123.

Conjugate connections and ordinary differential equations. Colloq. Math. Soc. Janos Bolyai 31 (1982), 184–804.

Sur les connexions plates d' un fibré banachique. C. R. Acad. Sci. Paris Sér. I Math. 295 (1982), 353–356.

Transformations of linear connections. Period. Math. Hungar. 13 (1982), 289–308.

Flat bundles and holonomy homomorphisms. Manuscripta Math. 42 (1983), 161–170.

Transformations of linear connections II. Period. Math. Hungar. 17 (1986), 1–11.

Total differential equations and the structure of fibre bundles. Bull. Greek Math. Soc. 27 (1986), 149–159.

Floquet-type connections on principal bundles. Tensor (N.S.) 43 (1986), 189–195.

On affine extensions of the holonomy homomorphisms of flat principal bundles. Colloq. Math. 59 (1990), 263–268.

Some applications of conjugate connections. Proc. 3rd Internat. Congress of Geometry, Thessaloniki (1991), N. Stefanidis Ed., 434–442, Aristotle University of Thessaloniki.

Characterizations of flat bundles via total differentiation. Tensor (N.S.) 52 (1993), 1–6.

On a class of principal bundles over symplectic bases on Euclidean spaces. Demonstratio Math. 26 (1993), 75–92.

On a type of total differential equations in Fréchet spaces (with G. Galanis). Proc. 24th Conf. Geom. Topol., Timişoara (1994), 119–128.

From principal connections to connections on principal sheaves. Anal. Stiint. Univ. "Al. I. Cuza" Iaşi 42, Suppl., (1996), 149–160.

On the geometry of the sheaf of frames of a vector sheaf. Proceedings of the Workshop on Global Analysis, Differential Geometry and Lie Algebras (Thessaloniki 1995), 141–146, BSG Proceedings 1, Geometry Balkan Press, Bucharest, 1997.

Transformations of sheaf connections. Balkan J. Geom. Appl. 1 (1996), 117–133.

On the triviality of homogeneous principal bundles. Proc. 4th Internat. Congress of Geometry, Thessaloniki (1966), N. Artémiadis – N. Stefanidis Eds., Giachoudis – Giapoulis Publ., 417–423.

A generalized frame bundle for certain Fréchet vector bundles and linear connections (with G. Galanis). Tokyo J. Math. 20 (1997), 129–137.

Flat principal sheaves. Semin. de Mecanica, Univ. Timişoara, **55** (1997), 1–34.

Connections on principal sheaves. New Developments in Differential Geometry, Budapest 1996, (J. Szenthe Ed.) 459–484, Kluwer Acad. Publ., Dordrect, 1998.

A. Mallios' $\mathcal{A}$-connections as connections on principal sheaves. Note Mat. 14 (1994), 237–249 (1997).

A Floquet–Liapunov theorem in Fréchet spaces (with G. Galanis). Ann. Scuola Norm. Sup. Pisa 27 (1998), 427–436.

Topological algebras and abstract differential geometry. J. Math. Sci. (continuation of J. Soviet Math., New York), 95 (1999), 2669–2680.

Vector sheaves associated with principal sheaves. Proceedings of the Workshop on Global Analysis, Differential Geometry and Lie Algebras (Thessaloniki 2001), 197–206, BSG Proceedings 10, Geometry Balkan Press, Bucharest, 2004.

On the geometry of associated sheaves. Bull. Greek Math. Soc. 44 (2000), 157–170.

On certain Flat Fréchet principal bundles and their holonomy homomorphisms (with G. Galanis). Algebras Groups Geom. 17 (2000), 105–122.

Connections on $\mathbb{A}$-frame bundles (with M. Papatriantafillou). Sci. Math. Jpn. 54 (2001), 29–38.

On associated Fréchet vector bundles (with G. Galanis). Algebras Groups Geom 19 (2002), 277–288.

Universal connections on groupoids (with A. Nikolopoulos). Int. J. Math. Math. Sci. 23 (2003), 1465–1480.

On the cohomology and geometry of principal sheaves. Demonstratio Math. 36 (2003), 289–306.

Remarks on the cohomological classification of certain Fréchet fiber bundles. Balkan J. Geom. Appl. 9 (2004), 23–31.

A generalized second order frame bundle for Fréchet manifolds (with C. T. J. Dodson and G. Galanis). J. Geom. Phys. (2004) (in press).

Geometry of Principal Sheaves. Springer, 2005, pp. xvi + 444 (book in press).

On the vector bundle structure of the second order (acceleration) tangent bundles (with C. T. J. Dodson and G. Galanis) (submitted).
